EDUCATION

Batam State Polytechnic

Aug 2021 - Present

D3 Informatics Engineering

In lectures I learned about many things and focused in web development, which learned about front-end website and back-end website with programming language concepts using PHP and javascript. I'm also learned about UI/UX design and project management. On my past project, i take a part as all rounder in team engaging in **Project Based Learning** such as leader in SLIMS Application who manage the project and team, designer who design all of the UI/UX and also the coder.

WORK EXPERIENCE

Infinite Learning Indonesia

Feb 2023 - June 2023

Intern Web Development

As an intern, here I hold 3 projects with different position such as :

- **Project Manager and UI/UX Design** in Anxiety Disorder Treatment Website. As Project manager I have manage all the work of team members to ensure projects can be completed by the deadline. Here I can do research regarding the users and products that will be produced then create wireframe and a design web before implementing it on the web.
- **Front-end Coder** in Money Wise Website. I build this project with PHP Native and Java Script .
- **Project Manager and Full Stack Web Coder** in TOUR'U Website. This project is a combination of a mobile application and a website so I have a big responsibility to ensure that this project can be completed as a website and also a mobile along with my work as a web coder using the Java Script programming language and also React JS.
